MISSION STATEMENT

ERG International is committed to using only the finest materials and components available to build products that result in complete customer satisfaction. ERG is continually listening to our customers in order to build and design the best furniture for their specific needs.

We will always try to accommodate your needs in a timely fashion and guarantee safe shipping to your destination.

MADE IN U.S.A.

We are very proud to offer American made products. This means we are creating American jobs and supporting American material suppliers. This makes ERG very flexible. We can offer more choices and we can control our quality and delivery. The best part is that we are here to listen to you, our valued customer.

GREEN STATEMENT

ERG International is always looking for better ways to be kind to our mother earth. Our Green Program insures that we manage as little waste as possible in respect to power, water and all raw materials.

ERG's manufacturing facilities are located in the coastal town of Oxnard, California where the EPA (Environmental Protection Agency) standards are the highest in the nation. EPA dictates that we use only water-base and water-soluble products in all our manufacturing processes. Wood stains, sealers, lacquers, glues and adhesives used by ERG are all waterbased and water soluble products, and carry Greenguard Certification.

Other ways ERG contributes to our Green Program is we use only recyclable vinyl, PVC and polypropylene plastics. 98% of all wood used in the making of our furniture is from well managed forests backed by the FSC (The Forest Stewardship Council) and the SFI (Sustainable Forestry Initiative). We reclaim as much powder coat paint as is physically possible. This is achieved through a reclaiming facility and also using our in-house equipment. We use only plastic and paper that is recyclable for packaging our products. All usable wood excess is used for manufacturing pallets and crates. All excess steel is sent to a recycling center every week. All potential product additions to our line always include evaluating what that product does to our planet. We are committed to our customers and our planet!

MOISTURE BARRIER:

ERG International offers an optional moisture barrier to seats only on all seating products. The barrier is applied over the foam and under the fabric. Please specify "MB" option with product model number and add corresponding list price per seat.

FIRE RESISTANCE:

Due to the vast choice of fabrics with varying degrees of flame retardancy, we suggest you consult the published technical data of the fabric supplier. ERG International assumes no responsibility for the flame retardancy of any fabric.

California Technical Bulletin #117 relates to fabrics as well as resilient filling materials (i.e. foam and dacron), all ERG International products conform to this standard.

Certain jurisdictions require the use of additional fire retardants such as the regulation known as California Technical Bulletin #133 (CAL-133). ERG International provides compliance with this standard by application of a fire barrier material. Labels indicating fire retardancy compliance can be placed on the underside of all seating products when required. Please specify "FR" option with product model. The cost is $90 List per yard of fabric required for the unit specified, or as noted.

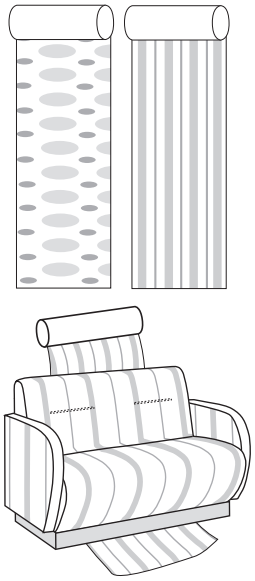
MULTI FABRIC OPTION:

When two or more fabrics are used on one unit add Code 2FO (3FO or 4FO) to the model number and the price will be the grade average. Example: fabric 1 is Grade 7 and fabric 2 is Grade 5 - the entire unit will be calculated at Grade 6 pricing.

Specify which illustration shows how fabric is to be applied to furniture:

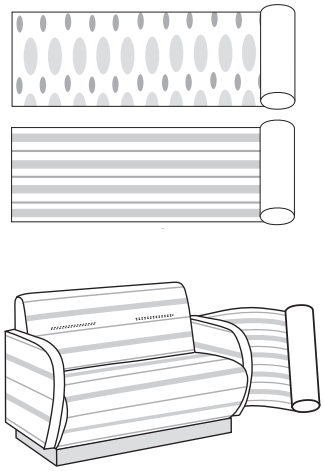
Non-Railroad

Non-Railroad fabrics require seaming of fabric on one-piece cushions greater than 54".



Railroad

Railroad fabrics allow tailoring of one-piece backs or seat cushions of sofas without seams.



COM SPECIFICATIONS

ERG International is pleased to cooperate with COM selections. However, ERG cannot be held responsible for the performance of COM materials. ERG assumes no responsibility for the appearance, durability, colorfastness or variations in tone of weaving of customer-supplied materials and fabrics. All responsibility for COM shipments is between the customer and the source from which the choice was made.

COM YARDAGE

All yardage requirements are listed in the COM requirements column of the price list and are based on 54–inch goods which are not necessary to match. ERG recommends the use of 54–inch materials. In the case of some unusually styled COM's, there may be an additional charge for cutting, matching and sewing. Fabrics that are very light or see-through will be sewn with an underlining. This additional expense will be incurred by the customer.

COM APPROVAL PROCEDURE

Prior to order placement, a sample "cutting" of the proposed COM must be submitted to ERG for preliminary approval on the intended item. A minimum 8" X 8" size sample is adequate for solid fabrics. If COM has a repeat pattern, a sample large enough to show the repeat is required. The right is reserved to reject the COM if ERG considers the COM inadequate for any reason. The customer will be notified immediately of the rejection of the COM for the intended item.

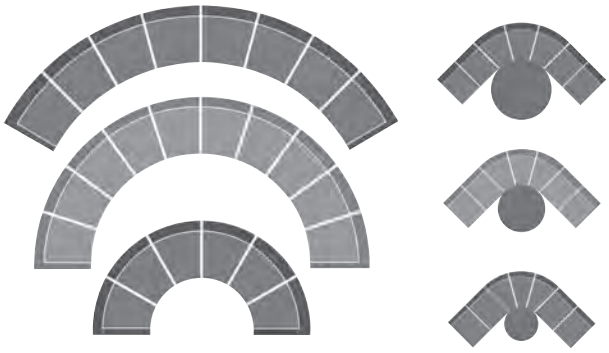
We welcome your inquiry.



REPLACEMENT UPHOLSTERY COVERS

Optional replaceable upholstery covers can be changed or cleaned and replaced on-site. Covers are attached with Velcro®

Please refer to options on specification page. Some things to consider: if you plan to reorder replacement pieces in the future, the same die lot/fabric may not be available, and the base cover is not replaceable. An optional laminate plinth base may be preferable so that changes in fabric from seat to base would not be an issue.

WHERE TO USE KATE MULTIPLE SEATING?

Medical clinics, hospitals, reception areas, lobbies, waiting rooms and anywhere where increased privacy is desired. Kate Multiple Seating is uniquely designed to fill this requirement.

OUR PERSONAL GUARANTEE

Because every fabric stretches differently ERG sews and fits a complete seat and back sample prior to cutting your COM fabric to prevent wrinkles or loose fit. With this extra attention to detail ERG guarantees a perfect upholstery fit.

TABLE TOPS

All table tops are 1.25" overall thickness unless otherwise noted. Core material is high density particle board with no added urea formaldehyde. We install backing material to the underside of each table. All glue used in our process is 100% water soluble, nontoxic and environmentally friendly.

Table tops can be finished in your choice of laminate, wood veneer Corian or Solid Surface (where available).

T-Nuts and Screws: ERG never uses wood screws. All bases are connected to table tops with metal inserts. Steel machine screws are then inserted into metal inserts, for a metal-to-metal connection.

Laminate samples can be obtained from these manufacturers by contacting them direct at the numbers or websites listed below:

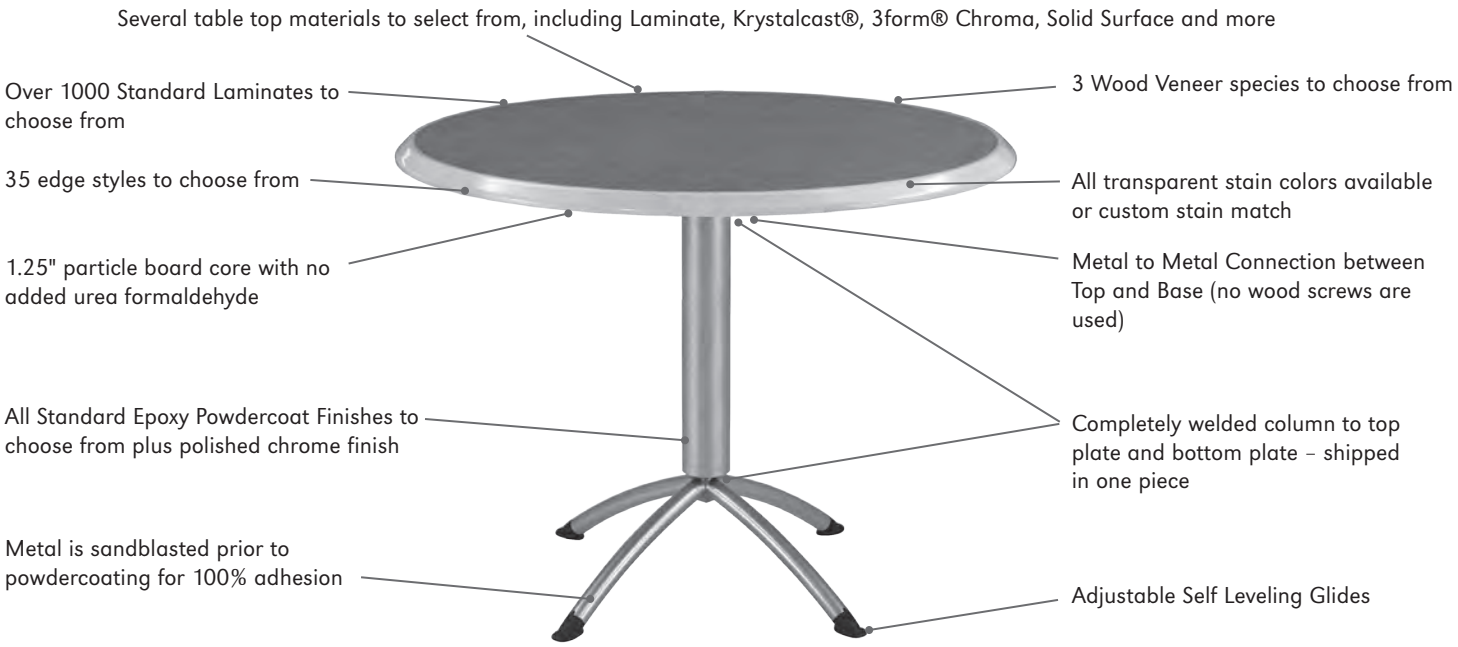
TABLE QUALITY PROFILE



- Our "top to base fit" guarantees the strongest table. All tabletops are shipped with pre-installed metal inserts to attach the base to the top with four machine screws. NO WOOD SCREWS ARE USED (wood screws will loosen over time and weaken the strength of the top as they are inserted directly into the wood core).
- Our Tabletop core material has no added urea formaldehyde. ERG complies with the California Air Resources Board (CARB) regulations and is CARB Phase I and Phase II compliant.
- Our factory uses ONLY 100% water-based products, including stains, lacquers, and adhesives.
- All welds are hand brazed and polished smooth. ERG gives you a truly complete one piece metal base. This means that you do not have to assemble the top plate, column and bottom base together as we have assembled and welded it for you.
- ERG sandblasts ALL METAL COMPONENTS including Table Bases which gives you the best powdercoat paint adherence in our industry!
- Most of our Table Bases have self-leveling adjustable steel glides. These specialty glides allow table leveling on the most uneven of floors.
- We are so confident in our packaging department that we GUARANTEE safe delivery 100% of the time. If you have ANY freight damage, ERG replaces the furniture Free of Charge. You do not need to handle freight claims! This is ERG's hassle-free freight Guarantee.
- ERG offers a Standard LIFETIME warranty on all steel table bases under conditions of normal use and maintenance.

Most ERG table bases are fully welded, guaranteeing optimum durability. The competition will offer you a 'Tie-Rod Assembly' which loosens over time.

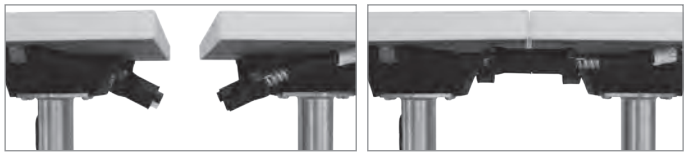
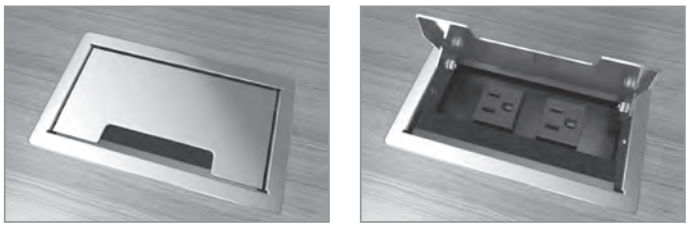
Powernest quick connect system

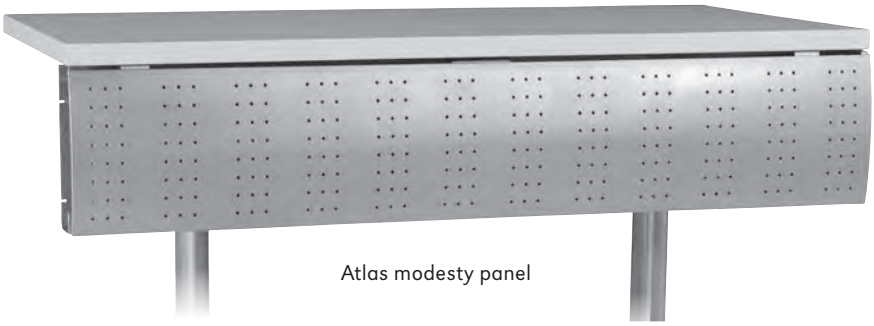
Powernest outlet with quick connect hard wire plug



P-leg detail



Powernest table top dual outlet



Atlas modesty panel

Explanation of Villa Series (Quick Connect) Capabilities.

All local codes of an installation must be followed.

The Corded (soft wire) is a single circuit 15 amps allowing 8 duplexes or 16 simplexes to be connected. This is the maximum load this circuit can withstand. A dedicated circuit to a single wall outlet must be installed to insure the ability to connect maximum duplexes. Usually within a building or office, a standard wall outlet is not a dedicated circuit and is shared with other outlets causing the available load to be greatly diminished.

The Multi-Circuit Quick Disconnect is a 4 wire, 2 circuit, 20 amp allowing for 10 duplexes or 20 simplexes per circuit bringing the capabilities up to 20 duplexes or 40 simplexes per installed dedicated outlet. The Quick Disconnect box must be installed with its own dedicated 2 circuit 20 amp line.

Needing to expand our production area, we moved our upholstery and foam application departments to our new facility down the road. This allows us to more easily accommodate large production orders.

A few words about ERG's high quality standard of upholstery and foam application:

Each and every one of our wood frame products are handcrafted with loving care and made to last a lifetime! ERG guarantees upholstery to be crisp, clean and without any wrinkles.

Every wood frame is finished with a multi-ply or hard surface and then covered entirely with high resiliency foam, which is bonded to the frame with a water-based adhesive.

A thick fiber is then stapled over the no-sag springs to stabilize them and equally distribute the seating load.

Why do we insist on these time-intensive processes?

To protect the fabric/upholstery from deteriorating, ripping or being cut at seams, corners or edges.

Here are some questions to ask before purchase:

- Why invest in furniture that will not last or can be easily damaged from the wear and tear of public use?
- Why buy furniture that will look shabby soon after your purchase is delivered to your site?
- Why regret your decisions?

Let ERG International make you shine and your clients happy with your furniture selection!

Unlike most major furniture manufacturers, which hire sub-contractors to make their parts, ERG fabricates nearly all furniture components in our Oxnard, California manufacturing facilities.
