GOBI

The Gobi chair features a two piece polypropylene shell with a channel-textured back and seat with a clean out feature. This series offers both sled and 4 leg bases in café height and bar stool height, with options to include seat inserts. Gobi sled bases are high density stackers – up to 45 on a dolly! The sled also offers a left or right tablet arm that is removable, flips up and slides in and out, as well as a removable basket. Great for schools and cafeterias.
